

EIE LAB

Weekly Supervisor Meeting 2: 28 September 22CSI Lo-AwareComp

Topic: Meeting

Location: 200m

Time: 8:30 am

Attendees: Dr Hazelhurst, Tristan, Robin

Agenda: • Dynamic directive

↳ clusterOptions.

• Disk C access

• Every process called?

Disk C → not mounted to head node.

↳ use slurm, log on to worker node

↳ access there.

Array → nodeslug → clusterOptions → use that

• call routine to check, to decide

should add clusterOptions within each process?

↳ amend code? which file should

BAM 50 gb? BA1 50 kb? Different nodes.

Discuss in report possibly.

• Call to log into specific node. ssh into it.

↳ node name, slur to ask for node based on demand.

↳ instead of select "ssh n10" e.g.

Next meeting 8.30 monday.
