EIE LAB

Weekly Supervisor Meeting 4: 10 October   22GS1 LocAwareComp.

Topic : Meeting

Location : Zoom

Time : 8:30 am

Attendees : Dr Hazelhurst, Tristan, Robin.

Agenda : • Dynamic : use subscribe to trigger function?

                convert to bash so can use function?

    • weighing : Aggression set by file size?

          → What size? Testing? • Consider leaving out.
                              or testing for ranges

- Find out about workflows we can use. → will find.

• Running on specific nodes, we set clusterOptions.

      ↳ always on worker nodes

         ↳ does commands only trigger head node? Use
                                   squeue.

• Next meeting, in person on wednesday.
                                     ↓
                                  in script
                                  use

→ clusterOptions uses name, not file object   (hostname)

   clusterOptions > staging working   dot command
                                    out file
      ↓   ↓   to show
  File not   File visible   which procces
  visible   it was.

   pre-allocate clusterOptions

   modify CO. instead hash map look up

      ↳ more into name.

• 8am wednesday.
